01 / HQ DIRECT · V4.1

Trust opens dialogue.
Delivery sustains relationships.

HQ-managed country sales general manager

HQ organizes products and delivery. The resident sales lead turns access into clients, contracts and cash.

One resident lead reports to HQ. Advance accounts, negotiation, purchasing and collections in the field; HQ organizes products, pricing, legal, finance and delivery.

Y1 fixed resources USD 326,926. Pay target AED 600,000/year; housing, vehicle, meals, travel and two-country work permission are separate. Pay / benefits remain negotiable.

Retain the original order mix and compare growth / delayed cases; assess contracts, revenue, receipts and full-cost contribution over three years.

02 / SALES LEAD AND ACCOUNT ACCESS

Turn existing access into named opportunities.

Map responsibilities to experience and access; refine purchasing interest / budget through specific themes.

Access and account development	Direct access to Emaar, Al-Futtaim, Saif Belhasa and DMCC, with established strategic introductions. Progress from introduction to named process owners and purchasing.
Explain the business need	Refine Gulf advisory experience in market entry and design-to-price-to-delivery helps define propositions, priced scope and delivery boundaries.
Negotiation and HQ coordination	Emaar developer engagement maps to senior dialogue, working meetings and commercial coordination. HQ approves commitments, contracts and pricing exceptions.
Cost, execution and collections	Cotti UAE operations maps to costs, suppliers, cross-functional work and operating reviews. Apply it to project progress, delivery coordination and collection issues.

Four direct routes

Emaar	Project acceptance / tenant or supplier evidence / Use a workflow map and credential demo to seek a discovery session.
Al-Futtaim	Aftersales, supplier collaboration or reconciliation / Identify one cross-party verification issue, then arrange HQ technical dialogue.
Saif Belhasa Holding	Vehicle, equipment or supplier credentials / Define issuing, verification and correction roles for a bounded pilot.
DMCC	Member-trader credential interoperability / Follow focused dialogue with member needs; do not assume DMCC is the buyer.

The two established Saudi royal routes, Yasir Al-Rumayyan-related business circle and pan-Arab institutional route are reachable. The introducer arranges dialogue and a named business contact, followed by working sessions, proposals and procurement. Allow time and resources.

Use Wasta for trusted introductions, reciprocity and progress feedback. Ask for a named process owner after senior dialogue, then advance working sessions, scope, purchasing and contracts. Allow time and cost.

03 / AUTHORITY AND PRODUCTS

Field sales advances business. HQ owns commitments.

Record responsibilities / response in the mandate and project process; resource paid delivery by project.

Country sales GM	Account plans, relationship dialogue, needs, demos, negotiation, purchasing, delivery coordination, collections and retention.
HQ product / presales	Product boundaries, technical scope, demos, effort, delivery calendar and acceptance; 12 effective presales weeks in Y1.
HQ management / legal / finance	Authority, price floors, exceptions, signing, invoicing, receipts, revenue / incentive approval and employment / tax assessment.
Project-based partners	Provide approved Arabic, PRO, employment or local integration services under scoped contracts, with appropriate permissions and purchasing.

Three priceable work packages

Discovery / USD15,000	One problem, workflow / data baseline and next-stage SOW; about two active weeks across 4-8 calendar weeks.
Bounded pilot / USD55,000	One credential, two roles, up to three interfaces and one test workflow; about six technical weeks across 8-16 calendar weeks.
Production implementation / USD180,000	One operator, one workflow and up to three existing-system interfaces; 24 person-weeks over a four-month baseline.

Per live project: one support person-day USD 700 + cloud / monitoring USD 200 per month; extra work priced separately.

HQ or the legally approved entity contracts, invoices and receives business funds. Propose presales assignment within two working days and initial scope within five days of complete inputs; agree complex quotes, legal and delivery calendars.

04 / PAY AND ASSIGNMENT BENEFITS

Separate assignment benefits from fixed pay.

Negotiation target AED 50,000/month ×12 =600,000/year, about USD 163,376/year. No automatic raises assumed.

Item	Planning basis	Y1 / USD
Fixed-pay negotiation target	AED 50,000/month ×12; benefits and expenses separate; not agreed	163,376
Employer statutory-cost reserve	6% of pay as a reserve; recalculate end-of-service / other duties under the contract, not a statutory flat rate	9,803
Single-person housing / utilities	AED 7,500/month; company provision OR capped reimbursement	24,506
Vehicle / local mobility	AED 2,200/month; company vehicle OR mobility allowance	7,189
Assignment meal allowance	Historic-policy reference AED 150/day ×365; leave-day eligibility pending; no duplicate meal claims	14,908
Connectivity / work tools	AED 4,400/year, outside pay and mobility	1,198
UAE medical insurance	AED 6,000/year planning premium; visa fitness exam separate	1,634
Saudi medical insurance	SAR 3,000/year planning premium; coordinate two-country coverage	800
HQ review / annual-leave flights	Two returns ×USD 2,000, including one leave trip; paid leave already in 12-month salary	4,000
Initial mobilization	USD 5,000 once for relocation / equipment; refundable deposit separate	5,000
Total	Pay + benefits + mobilization	232,414

Historic Refine structure: AED 150/day meals, single-person housing, vehicle and annual-leave flights; negotiate new-role amounts / eligible days.

Choose company provision OR cash allowance for housing / vehicle. Meal eligibility during leave remains open;335 versus 365 days saves AED 4,500/year. Leave wages are inside 12 salaries; flights are separate.

05 / TWO-COUNTRY WORK PERMISSION

Budget work permission separately in each country.

Employer-funded; match actual activities to lawful employment / sponsorship. Allowances are not approvals or official packages.

UAE / AED

Component	Y1	Y2	Y3
Work-permit allowance	3,500	0	3,500
Entry / status, residence and ID allowance	2,500	1,000	2,500
Visa fitness examination	400	0	400
Certification / translation / documents	1,600	0	1,600
Allowance total	8,000	1,000	8,000

Saudi Arabia / SAR

Component	Y1	Y2	Y3
Work permit / expatriate levy reserve	9,700	9,700	9,700
Visa / residence / re-entry allowance	4,300	3,300	3,300
Medical / attestation / documents	6,000	2,000	2,000
Allowance total	20,000	15,000	15,000

UAE assumes a two-year issue cycle: initial M1 and renewal Y3. Saudi initial cost is budgeted in M3; obtain applicable permission before local work. Rephase to actual validity.

Saudi SAR 9,700 reserve uses 100 permit fee +800×12 monthly levy. Historic annual cells differ from monthly arithmetic; actual Qiwa assessment, employer status and exemptions govern.

Insurance sits in benefits; PRO and employment services in sales support. Sponsors determine concurrent work / residence feasibility or lawful alternatives; replace corresponding allowances without duplication.

L01 UAE work permits S01 S01 S02 S02

06 / SALES SPEND AND HQ SUPPORT

Budget around clients and HQ support.

One field sales lead; HQ supplies product, presales, contract, finance and delivery resources.

Sales use	Basis	Y1 / USD
Gulf client travel	Y1 six ×USD 2,000: flights / hotels / transfers; meals not duplicated	12,000
Client meetings / Arabic	Y1 USD 500/month for named-account themes	6,000
Focused industry sessions	Y1 two ×USD 3,000 for account development	6,000
Account materials / demos	Y1 five packages ×USD 1,000	5,000
Employment / tax / contract advice	Case-based advice on two-country work, PE and commercial terms	6,000
Case-based PRO services	USD 2,000/year service fee only; official charges separate	2,000
Two-country employment-service reserve	UAE USD 8,000 + Saudi USD 6,000/year; excludes wages, insurance and permits; replace with approved-route quote	14,000

Full fixed resources / USD

Item	Y1	Y2	Y3
Pay / benefits	232,414	227,414	227,414
Work permission	7,512	4,272	6,178
Sales / specialist support	51,000	60,000	72,000
HQ non-billable presales	36,000	48,000	60,000
Total fixed resources	326,926	339,686	365,592

Y1 with 15% spending reserve: USD 375,965. Q1 with reserve USD 108,894 is inside the annual total. USD 2,000 refundable housing deposit uses cash only. Delivery / incentives follow orders.

No branch office, formation fee or local fixed technical team. Reserve USD 14,000/year two-country employment services, subject to quotes / legal review; no unconfirmed existing-HQ-payroll credit.

07 / ORIGINAL MIX AND FULL COST

Original mix. Revised costs.

Base acceptance mix: Y1 discovery/pilot/production 3/2/1; Y2 3/3/3; Y3 3/3/4.

Metric / USD	Y1	Y2	Y3
Project bookings	335,000	750,000	930,000
Planned revenue incl. support	335,000	822,000	1,119,000
Planned receipts	275,500	813,000	1,112,500
Direct delivery / support	206,138	488,213	637,163
Project gross profit	128,863	333,788	481,838
Fixed sales resources	326,926	339,686	365,592
Contribution before incentive	-198,063	-5,899	116,245
Unagreed incentive /5%	5,340	16,374	23,783
Contribution with incentive	-203,403	-22,273	92,462
Total cost	538,403	844,273	1,026,538

Steady-margin cost-coverage sensitivity

Gross margin	Before extra incentive	With 5% margin incentive
35%	934,073	983,235
40%	817,314	860,331
45%	726,502	764,739

Coverage revenue =Y1 fixed resources /[gross margin ×(1−incentive rate)]. Original three-year contribution USD-133,214; a positive third year is not cumulative payback.

Plan revenue at acceptance and expense delivery during implementation, creating timing effects. Contribution is before unallocated HQ overhead / tax, not company net profit.

08 / GROWTH ORDERS AND DELAY

Growth needs added orders; delay needs funding.

Retain base; explain added growth orders / capacity and do not assume delayed-case savings.

Growth-order mix

Metric / USD	Y1	Y2	Y3
Production acceptances	1	4	5
Planned revenue	335,000	1,011,000	1,350,000
Receipts	275,500	999,000	1,340,500
Total cost with incentive	538,403	964,341	1,160,675
Pre-tax contribution	-203,403	46,659	189,325
HQ project pool	3	5	6

Add one Y2 production order and grow Y3 from 4 to 5, staggering delivery. HQ pool 3/5/6 at 80% availability with effort in direct costs; field sales remains one person.

Funding and three-year result / USD

Case	Peak cash gap +15%	Three-year contribution
Original	336,799	-133,214
Growth	327,480	32,581
Six-month delay	551,966	-562,246

Growth yields only about +USD 32,581 over three years before unallocated overhead / tax. For faster recovery, agree pay mix, cost caps, pricing or order mix and revise client / delivery calendars.

Delayed case: projects, support and receipts move six months while pay / fixed spend continue. Annual reserves and peak-liquidity buffers are not additive.

09 / EXECUTION AND PERFORMANCE

Client timing is a window. Cash is a business result.

Allow 365-730 days for entry / replication and three years for sustainable business, with monthly and quarterly reviews.

M1-3	Product orientation / account preparation / Agree assignment, authority and permission route; prepare four account themes / one demo. Visit and listen, selecting two priority workstreams.
M4-8	Discovery / initial bounded pilot / Base discoveries start M4, M6 and M8; first pilot M6-8. Allow for onboarding and security / data reviews.
M9-12	Implementation purchasing / year-one review / After the first pilot, base production runs M9-12; second pilot M9-11. Manage acceptance, payments and client issues against contracts.
Y2	Group replication / service / Base 3 discoveries /3 pilots /3 production scopes. Growth adds one production order to 4, requiring client purchasing, presales and HQ delivery capacity.
Y3	Repeatable expansion / second market / Base 3 discoveries /3 pilots /4 production scopes; growth 5 productions with staggered delivery. Prioritize renewals / expansion and secure separate second-country work rights.

Plan B

Meeting slips 4-8 weeks / Work another core account, reuse demos and reduce custom materials / unnecessary travel; agree follow-up timing.

Purchasing adds 2-3 months / Do not fully mobilize production early. Contract independent discovery where suitable and roll the calendar.

Overall six-month slip / Use the delayed case, pause activity expansion and reallocate presales. The model retains budget before any approved savings.

Scorecard / incentive proposal

Propose receipts 40%, verified margin 30%, effective bookings 20% and account progress / renewal 10%. Y1 base bookings USD 335,000 and receipts USD 275,500; early review covers ownership, working sessions and paid scope.

The 5% verified-margin incentive is an unagreed example: accrue the accepted, collected share and pay next month. Base Y1 about USD 5,340 is included; if variable pay sits inside the package, split and recalculate to avoid duplication.

10 / HQ DECISIONS AND EVIDENCE

Turn strategy into arrangements HQ can approve.

HQ management is the organization model; implement authority, work rights and tax for actual duties.

Role / pay: agree whether AED 600,000 is fixed or includes variable pay, basic-pay split, tax, benefits, leave, incentives and settlement.

Budget / support: separately approve fixed resources, reserve, quarterly spend and presales effort; mobilize paid delivery by order.

Permission / contracts: secure lawful work arrangements, signing, invoicing and receipts. HQ signatures do not automatically eliminate PE exposure.

Reviews: build plans for four routes; review contracts, acceptance, receivables and costs monthly. Pair growth targets with purchasing and delivery resources.

Sources and assumptions

H41	Pay target, benefit allowances and three-case monthly model; not actual claims / orders.
R01	Refine policy visually reviewed for meals, housing, vehicle and leave flights; originals / private details withheld.
C01 / P36	CV / resource pack supports access and role mapping; scope, effort and prices remain planning inputs.
FX1 / FX2	Budget FX AED 3.6725 and SAR 3.75 per USD 1; not a bank settlement quote.
L01 / S01 / S02	Work permission, employer cost ownership and historic fee rules; replace allowances with sponsor quotes.

Find official links, modelJSON, three monthlyCSVs and independent arithmetic checks in the site Sources section. The branch version remains separate.
